For over fifty years, Eli Schwartz has inspired generations of economists through his prolific publications and dedicated in teaching. In 2008, the Martindale Center for the Study of Private Enterprise at Lehigh University invited prominent academics and practitioners—including Nobel Prize recipients, Robert Solow and Harry Markowitz, and former Chairman of the Economic Advisers to Ronald Reagan, Murray Weidenbaum—to contribute pieces that reflect their own approaches to issues that Schwartz has explored over the long span of his career. The twelve original essays cover a range of topics, including tax reform, corporate finance, fiscal policy, banking, economic growth, and globalization, representing a variety of methodologies, including economic theory, econometrics, and case analysis. The collection emphasizes the underlying connections among seemingly disparate facets of economic activity, and underscores the tremendous influence of Schwartz on economic analysis, policy, and leadership today.
