

# The Statistical Account of Scotland Volume 10; Drawn Up from the Communication of the Ministers of the Different Parishes

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1794 Excerpt: ...of the turnips, and must therefore be renewed with dung to put them into a condition for producing another crop. This new mode of farming, which was exceedingly unpopular with the tenants at its first introduction, bids fair, however, to increase greatly the rent of the lands, and to better the condition of the tenants. A few years ago there was no such thing known in this district as a turnip-fed bullock bullock or cow; but now there is not a tenant, who holds hit farm by a late lease, who does not feed from 5 to 10, and some of them upwards of 20, black cattle every season, which have hitherto turned to very good account, each yielding from al. to 3l. 10s. profit, and sometimes more. The land, after the turnip crop, is sown down with barley, clover, and rye grafs; the grafs is cut the year following, and pastured for the next four, and at second lifting is subjected to a different rotation. In the muirland part of the parish the turnip farming has not as yet been much tried; and, indeed, neither the soil nor climate seem to be fitted for such a crop. Neither the dale nor muirland part of the parish has been much esteemed for the production of pease. There is in general plenty of straw, but often very little grain. When the land in the muirs is properly cleaned, and sown down with clover and rye-grafs, it seldom fails to produce an excellent crop of hay. In the mossy lands there is a peculiar mode of cultivation observed. When the moss is deep, and so soft as not to bear the plough horses in winter, it is sometimes ploughed in the drought of summei burnt when so dry as to burn, the asoes spread over the whole, and then sown down in the sping, without any further cultivation, with barley and oats; and in favourable seasons a very

rich crop is produce...
