

IEC 60107-5 Ed. 1.1 b:1999, Recommended methods of measurements on receivers for television broadcast transmissions - Part 5: Electrical measurements ... the NICAM two-channel digital sound-system

Applies to television receivers designed for the reception of television broadcasts using the two-channel digital sound system. The sound coding-system is based on NICAM 728 and is transmitted by a quadrature phase-shift keying (QPSK) modulated digital subcarrier.
