# How to Learn Flash: Simple Interactive Pencil

How to Learn Flash is a series of Flash tutorials for beginners that walks you through the basic production pipeline of creating Flash projects without making you pull your hair out. In this exercise, Simple Interactive Pencil, you will create a basic project: a pencil that when clicked, draws a straight line. This first project, though very simple in appearance, shows the basic elements that are needed to build interactive projects in Flash: drawing, creating and naming layers, creating symbols, button states, importing images & sound, motion & shape tweens, animation, and Actionscript (Flashs computer language). I have had over 10 years of experience in teaching and using Flash, and I wanted to create a series of tutorials for all of those who were curious about learning Flash, but werent quite sure what was involved. This series of lessons has been adapted from classes I have taught to beginners who were just learning Flash.We at tonyteach believe that learning Flash, or anything for that matter, shouldnt be difficult or expensive, and our goal is to pack as many tips, tricks, and techniques into a single, simple, cost-effective project.With that in mind, the How to Learn Flash series is designed for a skill level of novice to beginner. This first project, Simple Interactive Pencil, should take between 30 minutes to an hour.
